**Subject:** Cross-validation study ; samples

Dear Robin,

we plan to send the 24 samples for the cross-validation study to MDS (Dr. Peggy Ruhn) and Covance (Mark Bentley) on Tuesday April 22, 2003. In order to announce the shipment to the two labs, I would need the e-mail address of Dr. Peggy Ruhn (I have already that of Mark Bentley). Robin, could you please send me the e-mail address of Peggy Ruhn.

I have another question: We have residual samples of the MDSPS 26586 Project. From most of the samples (332 in total) we have 50 - 100 ml left in the freezer. Should we keep these samples for further analyses?

Shixia, I shall send you the validation data of the method for the acrylamid-valine adduct either end of this week or next week.

Best regards

Gerhard Scherer
